

Simplified Consult Management for Modern Healthcare Teams

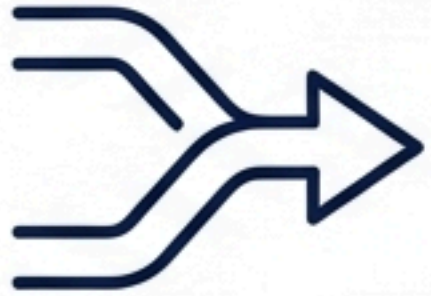

Aly Clinical Collaboration Platform

Internal Presentation for Hospital Leadership

Unifying the Clinical Workflow

Aly helps care teams streamline consult management and improve team communication with secure, easy-to-use tools.

Streamline

Eliminate phone tag and waiting for updates.

Collaborate

Instant access to on-call specialists and secure messaging.

Analyze

Track consult performance with actionable analytics.

25%

shorter hospital stays

55%

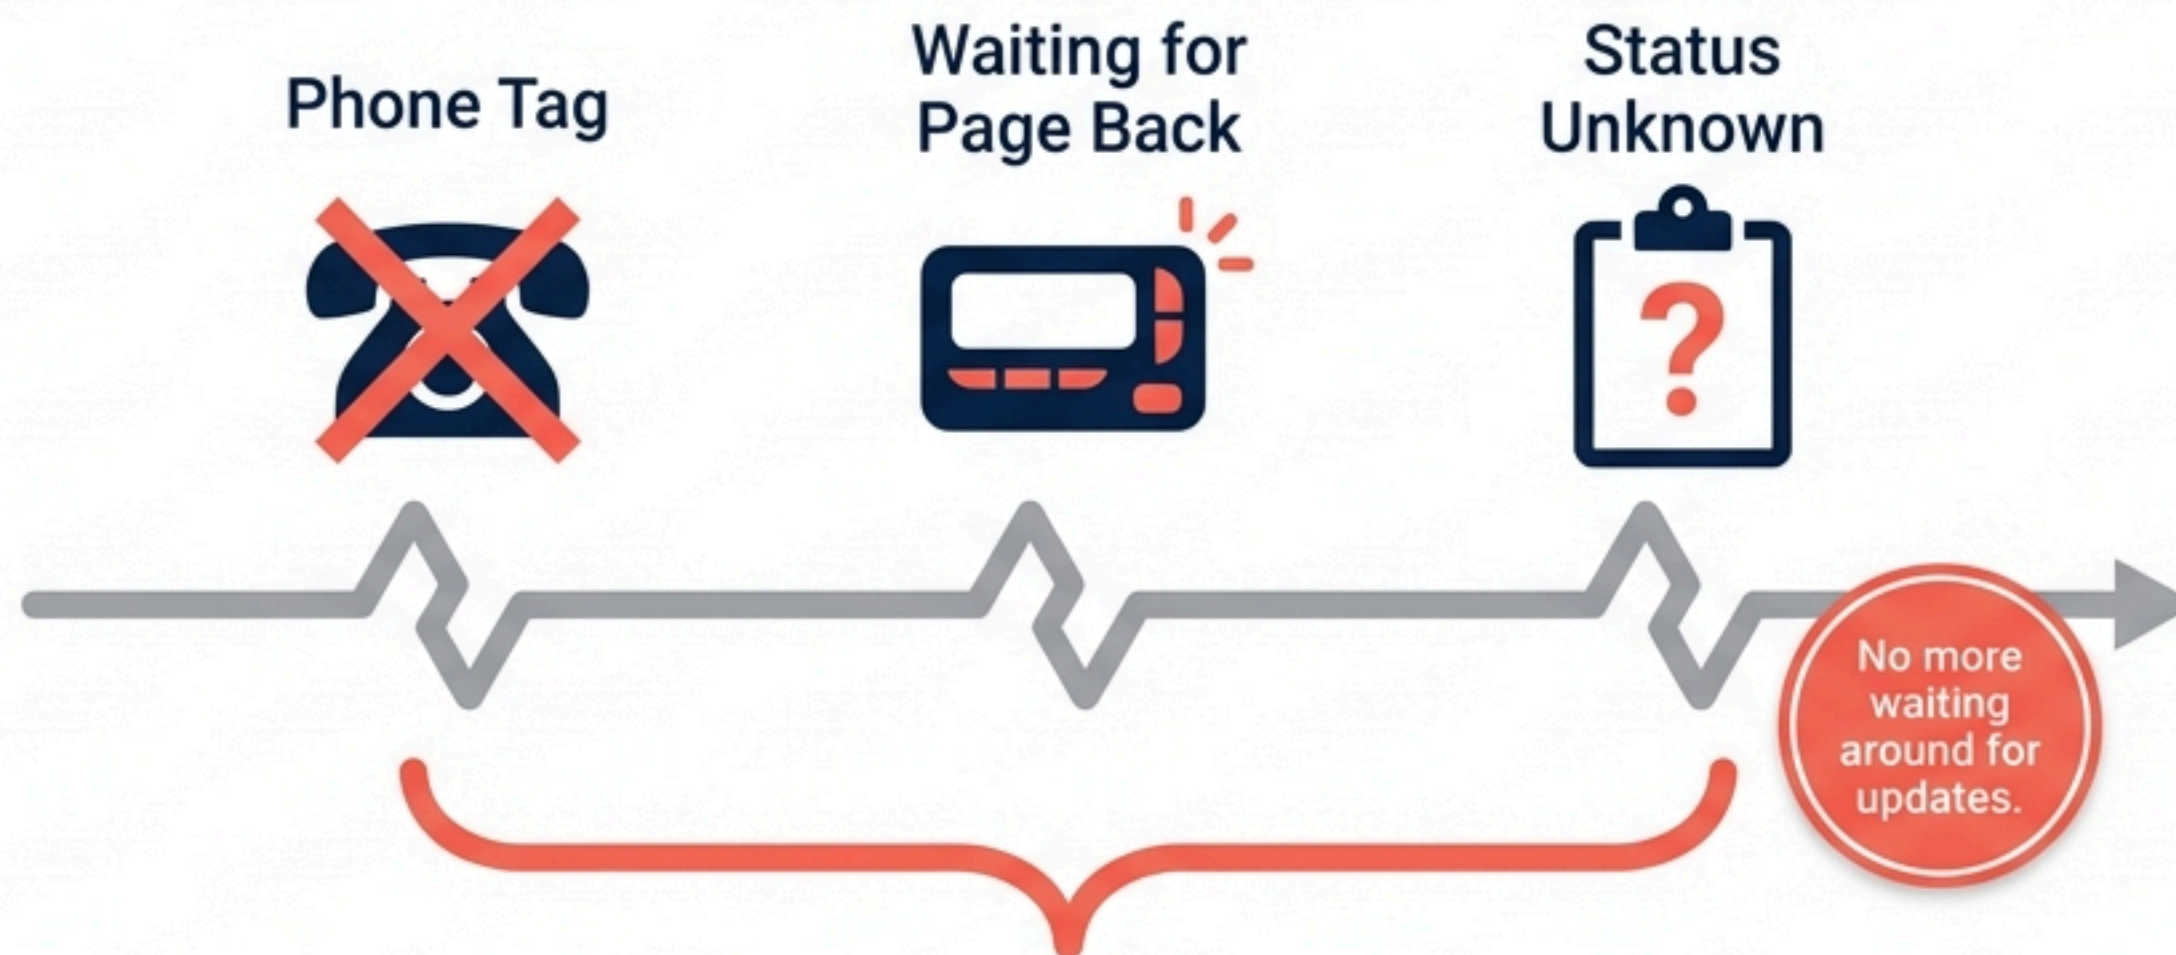

fewer delays between departments

40%

faster consult coordination

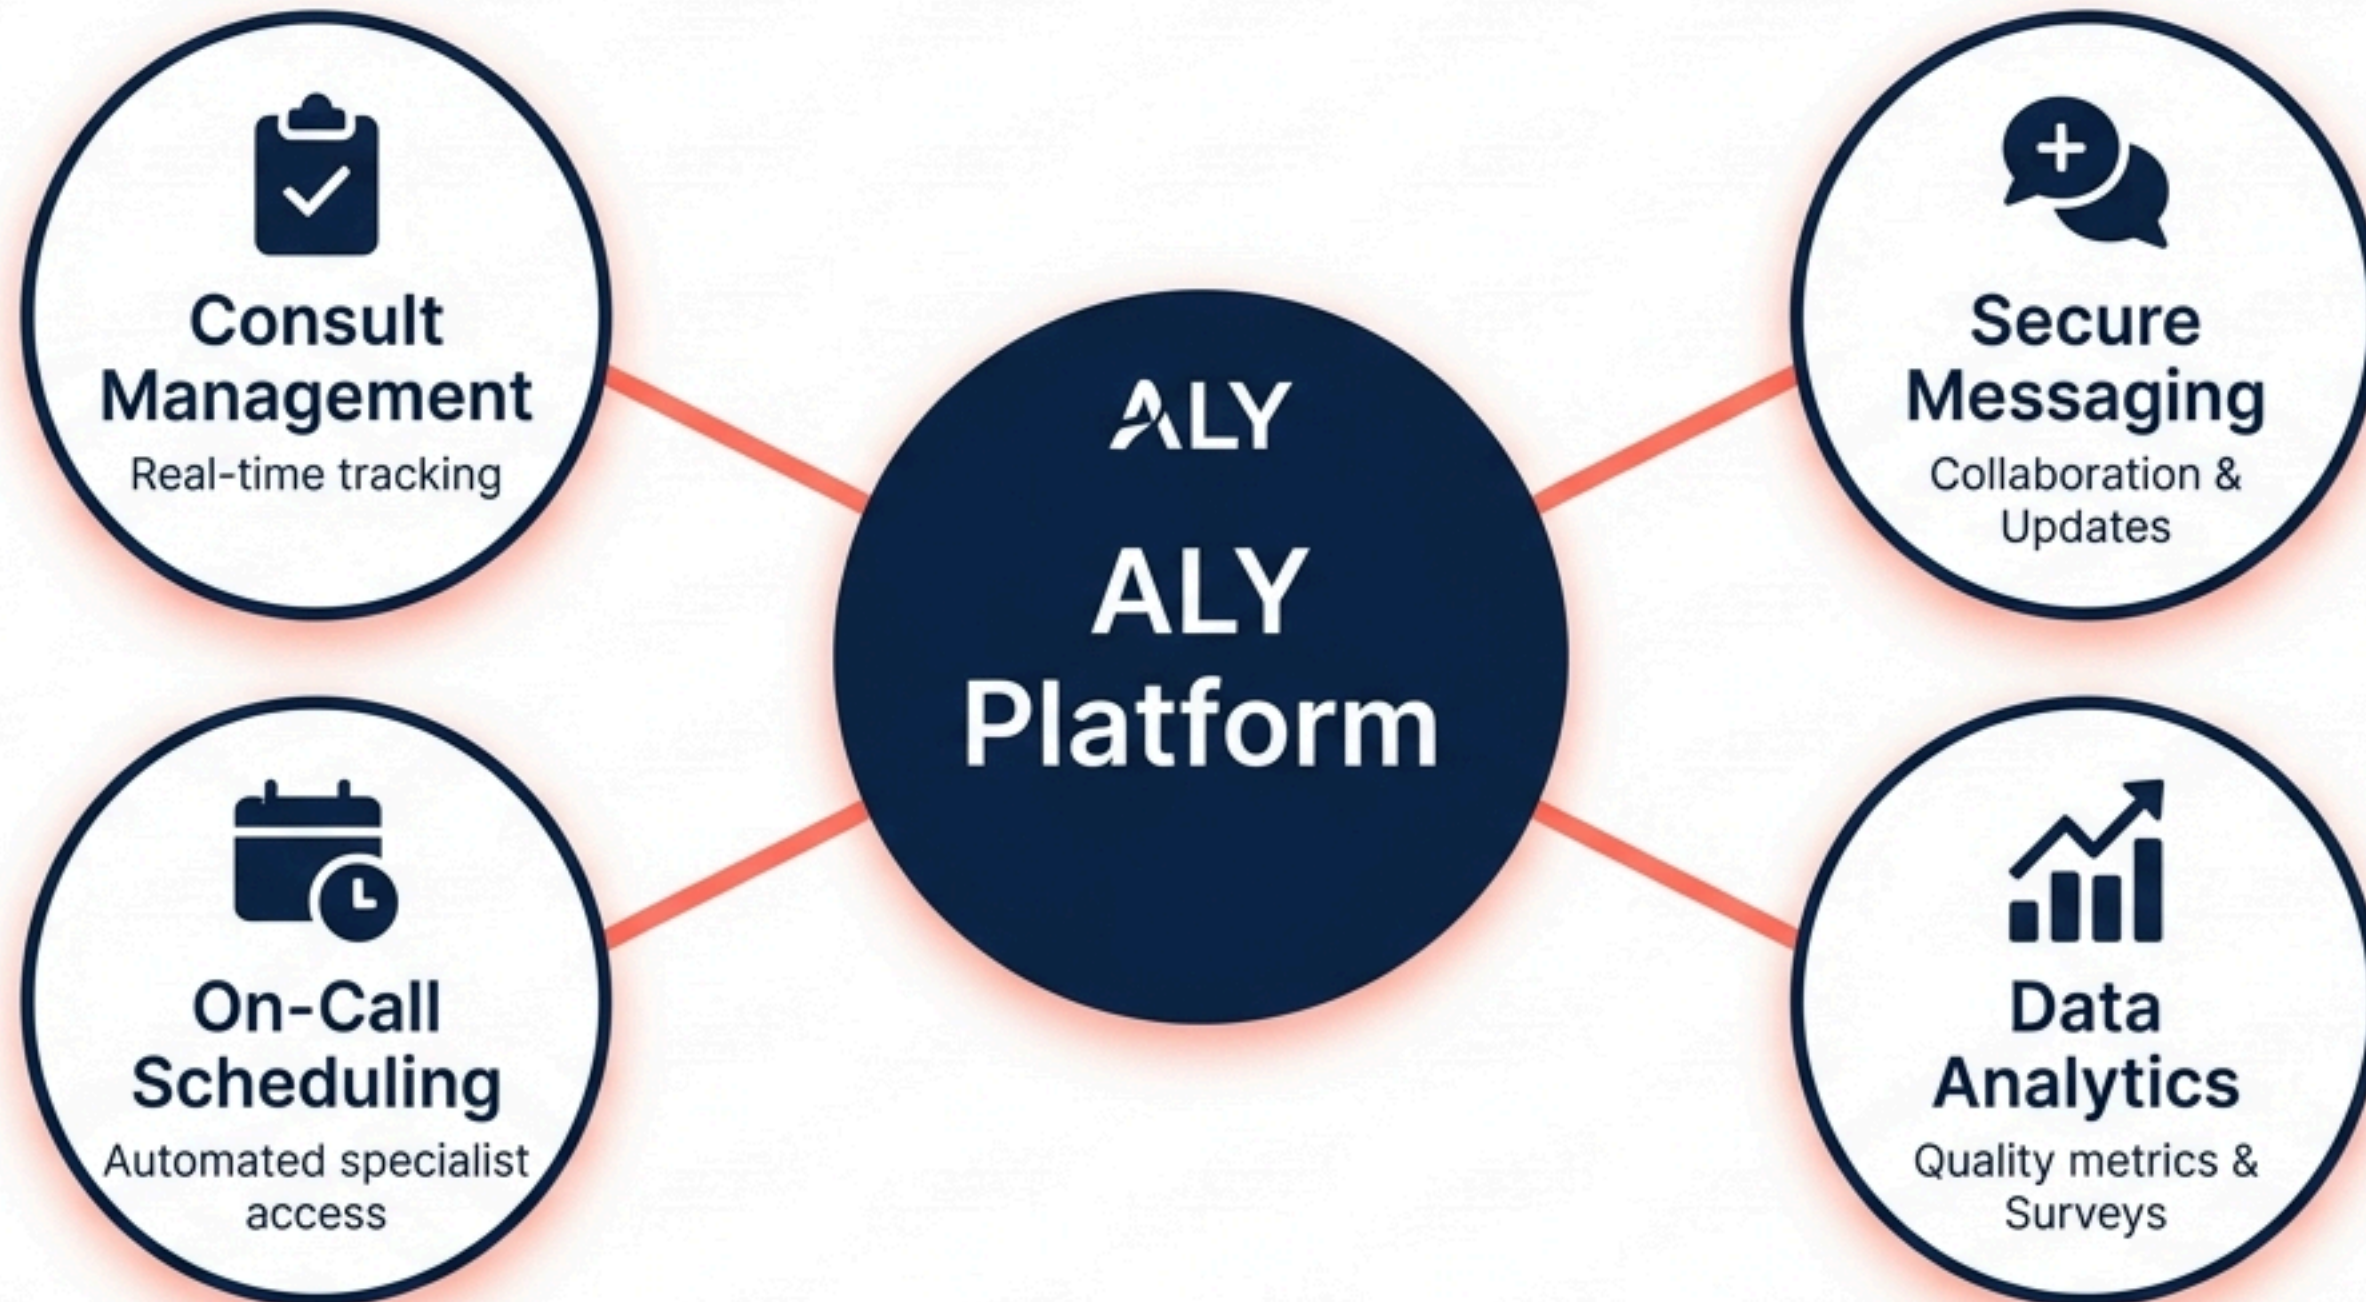

Fix the Bottlenecks in Your Consult Process

Current hospital workflows are defined by friction: waiting for updates, playing phone tag with specialists, and manual coordination gaps.

Consequence:
Delayed care transitions &
increased length of stay.

A Unified Ecosystem for Internal Consults

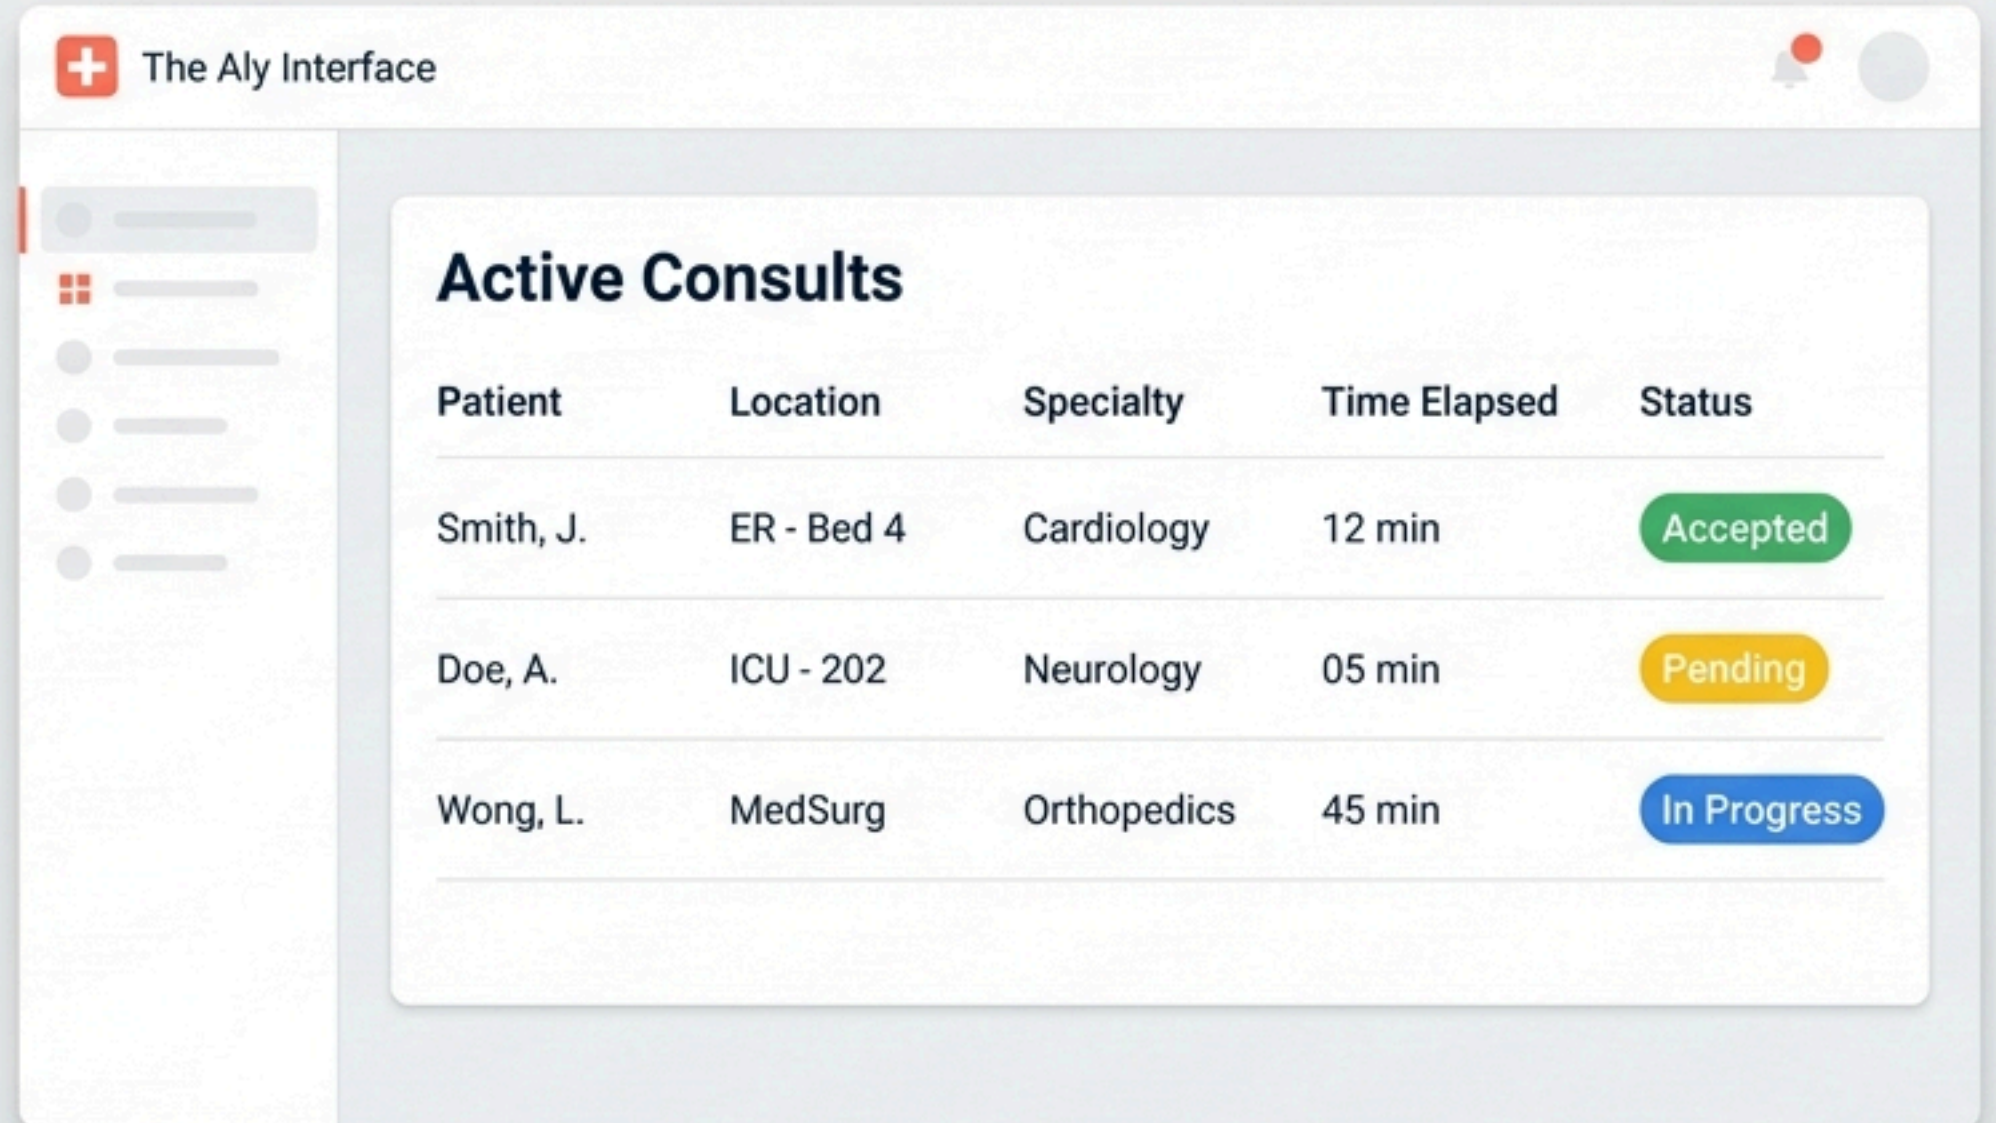

ALY unifies your hospital's internal consult workflow in one platform, ensuring instant on-call specialist access and real-time visibility.

Real-Time Visibility Into Consult Status

Move from "Request Sent" to "Action Taken."

- Real-time consult tracking.
- Instant status updates for the entire care team.
- Elimination of repeated follow-ups.

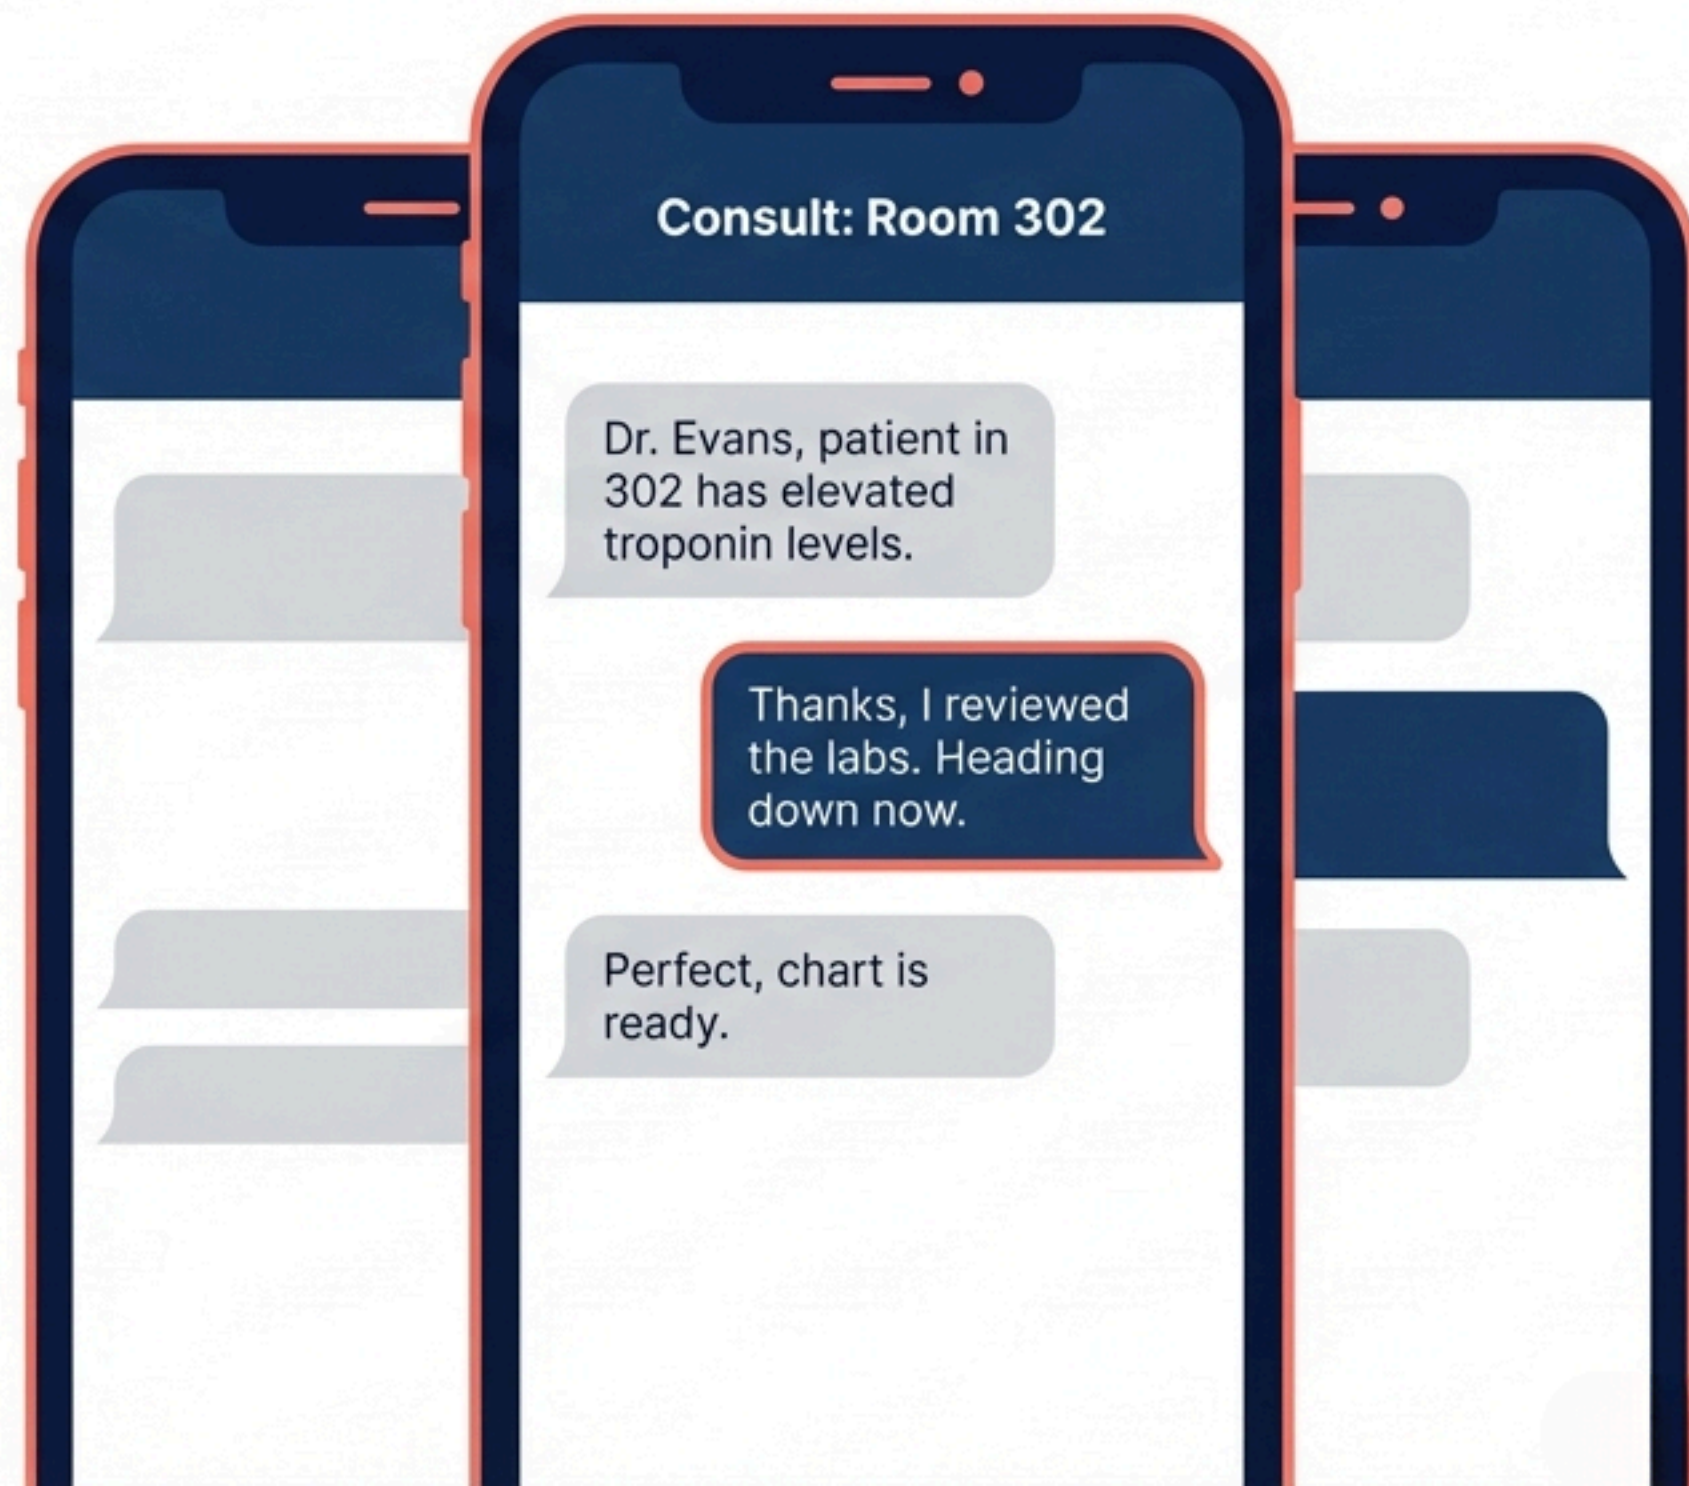

The screenshot displays a web application window titled "The Aly Interface". On the left is a sidebar with a grid icon and several menu items. The main content area is titled "Active Consults" and contains a table with the following data:

Patient	Location	Specialty	Time Elapsed	Status
Smith, J.	ER - Bed 4	Cardiology	12 min	Accepted
Doe, A.	ICU - 202	Neurology	05 min	Pending
Wong, L.	MedSurg	Orthopedics	45 min	In Progress

Secure Messaging & Team Collaboration

No more playing phone tag. HIPAA-compliant, secure messaging environment.

- ✓ • Direct collaboration between requesting providers and specialists.
- ✓ • Seamless handoffs and clear team communication.

Know Who's On Call – Automagically

Solve the mystery of specialist availability.

Always know who's on call without any hassle. ALY's intuitive module ensures seamless communication and coordination.

General Surgery

No Status Available

Improves response times by routing requests immediately to the correct provider.

The ROI of Speed: Accelerating Coordination

68% Improvement in first-response time

40%

Faster consult coordination overall

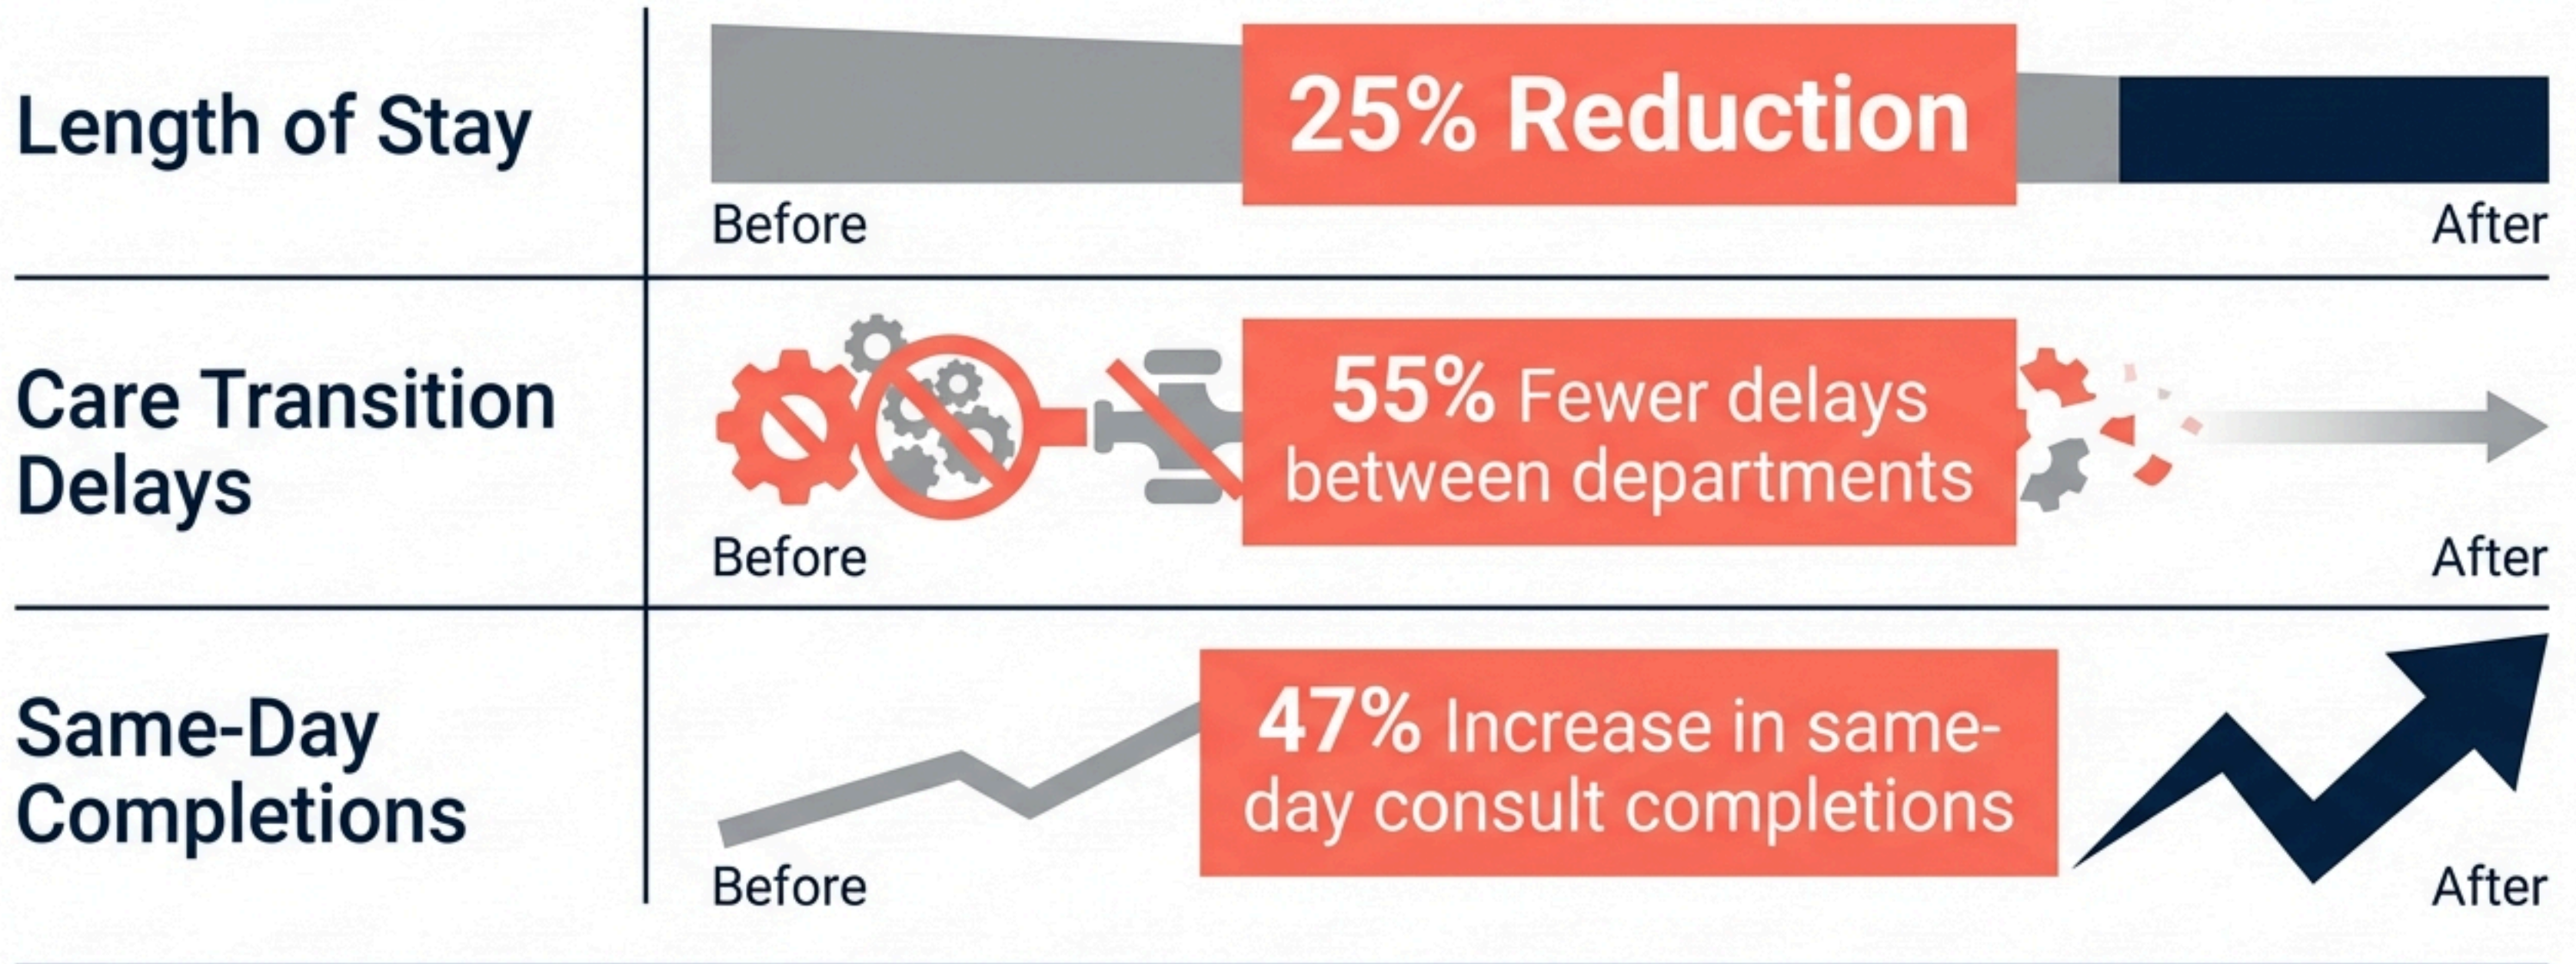

↓ 35%

Reduction in specialist response times

Speed isn't just convenience; it's capacity.

Measurable Impact on Patient Flow & Outcomes

Faster coordination leads directly to faster treatment and discharge.

Streamlined processes deliver better patient experiences and improved capacity.

Reducing Burden, Increasing Engagement

By automating the hunt for providers, staff can focus on clinical decision-making.

45% Improvement
in on-call specialist engagement

30% Decrease
in documentation burden

Automated workflows free up valuable time and focus.

Built for Physicians

Instant patient data at your fingertips.

- Save valuable time with faster consult requests.
- Seamless handoffs to the next physician.
- Improved patient outcomes through faster intervention.

Designed Around How Nurses Deliver Care

Streamlining workflows to support frontline staff.

- Reduce communication barriers with specialists.
- Real-time status tracking—stop wondering if the doctor received the page.
- Clear team communication streamlines care coordination.

Technology for Secure, Scalable Operations

Cloud-Based

- Adopt an all-in-one solution that ensures high uptime.

Resource Management

Simplifies how resources are allocated across the network.

Transformation

- Transforms how healthcare teams collaborate securely.

Gain Insights with Real-Time Quality Metrics

Validation: Over 16,000 patients processed.

- Combine actionable analytics with built-in surveys.
- Monitor consult performance and doctor approval tracking.
- Analyze key metrics to drive continuous operational efficiency.

Real Results, Better Patient Care

Aly delivers meaningful improvements across your healthcare organization—from the IT server room to the patient bedside.

25% Shorter Stays

40% Faster Coordination

55% Fewer Delays
